PROFESSIONAL SUMMARY

Entry-level Software Developer with a strong interest in Cybersecurity and hands-on experience in Python, Linux, AWS, Git, and automation. Built practical security tools, CLI applications, and web projects while developing offensive security skills through TryHackMe and HackTheBox labs. Strong foundation in secure software development, problem solving, and continuous learning, eager to contribute and grow in Software Development or Cybersecurity roles.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Cybersecurity:** TryHackMe, Network Security Fundamentals, Web Application Security, Password Security, Vulnerability Assessment, Log Analysis, OWASP
- **Security Tools:** Nmap, Burp Suite, Gobuster, Hydra, Metasploit Framework, John the Ripper
- **Cloud Technologies:** AWS (S3, RDS, SNS), Google App Engine
- **Developer Tools:** Git, Linux, Command Line Interface (CLI)
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, DBMS, Computer Networks

PROJECTS

Cybersecurity Toolkit

Python, CLI, re, os

- Developed a command-line toolkit to analyze password strength and identify common security weaknesses.
- Implemented rule-based validation to detect weak credentials and insecure password patterns.
- Automated security checks to provide actionable feedback for improving password security.

Password Strength Checker

Python, Tkinter, re

- Built a GUI-based password strength analyzer using Python and Tkinter.
- Evaluated passwords based on length, uppercase, lowercase, digits, and special characters.
- Provided real-time feedback and strength ratings to encourage secure password creation.

Personal Portfolio Website

HTML, CSS, JavaScript, Github Pages

- Developed a responsive portfolio website to showcase projects, certifications, and technical skills.
- Optimized the interface for desktop and mobile devices using modern web design principles.
- Integrated GitHub and LinkedIn links for improved recruiter accessibility.

CLI Automation Tools

Python, Bash, os, argparse

- Developed reusable command-line scripts to automate everyday system administration tasks.
- Implemented utilities for file organization, batch file renaming, backup automation, and system information collection.
- Reduced repetitive manual operations through Python and Bash scripting.

EDUCATION

Master of Computer Applications (MCA)

Gogte Institute of Technology, Belagavi

2025 – Present

Bachelor of Computer Applications

KLE'S College of BCA, RLSI, Belagavi

2022 – 2025 | CGPA 9.28

Pre-University Course (Commerce)

Gogte PU College of Commerce, Belagavi

2020 – 2022 | 89%

S.S.L.C.

Devendra Jinagouda High School, Belagavi

2019 – 2020 / 90.56%

CERTIFICATIONS

- Google IT Automation with Python Professional Certificate
- Tutedude Ethical Hacking Course
- AWS Cloud Practitioner Essentials on Udacity
- 10+ additional certifications available on LinkedIn

LANGUAGES

- English • Kannada • Hindi • Tamil • Telugu

ACHIEVEMENTS

- **Insignia Hackathon | Mobile App Development**

Collaborated in a team to design and develop a mobile application within a limited timeframe.

Applied problem-solving, teamwork, and rapid prototyping skills throughout the hackathon.

- **Campus Mantri, GeeksforGeeks:**

Selected as the official campus representative to promote GeeksforGeeks initiatives and technical learning.

Coordinated student engagement through technical events, workshops, and community activities.

- 20+ TryHackMe rooms completed.
- Active GitHub portfolio with automation and cybersecurity projects.
